

Customer: Winston Medical Center

Location: Louisville, MS

Size: 9,792 sq. ft.

Award Dates: May 9th, 2014

Days to Complete: 9 days

Project Highlights

- An EF-4 tornado struck Louisville, Mississippi on April 28th, 2014 leaving a devastating path 35.5 miles long and 3/4 mile wide.
- Winston Medical Center (WMC) was severely damaged and was not able to provide services for local residents and those in the tornado's path.
- WMC worked with BOXX Modular to evaluate and determine the best way to provide these needed services in the shortest amount of time.
- In 9 days, BOXX Modular's team was able to install a fully functional clinic/screening facility including interior build-out and customization, concrete building access systems, fire alarm and associated work.
